REMARKS

The captioned application is the U.S. National phase of International Application No. PCT/IT2004/000652. The present amendment to the claims is to better conform the claims to U.S. patent practice, e.g., correction of multiple dependencies, provision of proper antecedent basis, etc. None of the amendments are intended to narrow the substance of the claims, but rather are simply to address matters of form. The amendments to the Abstract are also to address matters of form.

Favorable consideration of the application is requested.

Respectfully submitted,

MAURO GELLI ET AL
